

### How to Dispose of Unwanted Medications

# Are you throwing unused medications and over-the-counter products down the toilet or the sink? <u>STOP!</u>

Flushing medications down the toilet or sink causes water pollution, impacts drinking water and has adverse effects on septic systems, fish and aquatic life.

#### Safe Ways To Dispose Of Medications And OTC Products Include:

- 1. Follow the **directions**, **below** and **put them in the trash**.
- 2. See if your **pharmacy** has a low-cost **disposal envelope** to **send** away (CVS, Walgreens and Rite-Aid all do).
- 3. Find out if the **local police** department has a **locked drug drop box**.
- 4. Bring them to a **one-day collection**.

#### Directions on how to throw away in trash:

1. Keep medication in its original container. Cross out patient's name or remove label.

- 2. Modify the medications to discourage consumption.
  - For **pills or capsules**: add a small amount of water to partially dissolve them.
  - For **liquid medications**: add salt, flour, charcoal, kitty litter or a powdered spice to make a pungent, unsightly mixture that discourages anyone from eating it.
  - For **blister packs**: wrap pack containing pills in multiple layers of duct tape.

#### 3. Seal and conceal.

- Tape medicine container lid shut with packing / duct tape.
- Place inside a non-transparent bag or container so it cannot be seen (i.e., an empty yogurt or margarine tub).
- <u>Do not</u> conceal medicines in food products because animals could inadvertently consume them.
- 4. Discard the container in your trash can. <u>Do not put container in your recycling bin!</u>

## NOTE: Certain chemotherapy drugs may require special handling, so check with your healthcare provider or pharmacist.
